**75 Years Ago** After perceiving the face of the moon partially obscured on Sunday evening persons not exactly acquainted with the reason for the strange conduct of this planet (notwithstanding the fact that the moon persists in getting full about once a month even in spite of the Volstead Law) they looked up their Hagerstown almanac and found it nothing more or less than an eclipse. The evening being clear it could be seen plainly. *Union Bridge Pilot*, October 21, 1921.
